

Introducing PokeDX

Trade all tokens on BSC

We use smart order routing to get you the best price across DEX networks.

Reflective Tokenomics

Constant Dividends with every transaction.
Automatic Yield Token – no staking required.

Total Supply

30M

Symbol

PDX

Network

BSC

Bridging the gap between investors and the world of DeFi, NFT's & Crypto

Trading, monitoring and portfolio management dapp that brings together permissionless real-time data, token research and discovery tools and integrated trade execution capabilities.

Access **ALL DEX liquidity** straight from **PokeDX.app**

PokeDX finds you the best prices across exchanges and combines them
into one trade, so you save 🕒 and 💰

Trade Straight
From Your Wallet

Why Binance Smart Chain?

Fastest Growing
Blockchain

Highest Daily
Active Wallets

Highest
Trading Volumes

Fast & Cheap
Transactions

We believe in decentralisation, but we also believe that BSC is the perfect launchpad for PokeDX. The low fees and high trading volumes makes BSC the ideal place to start and develop our ecosystem, before transitioning into a multi-chain protocol. We will be adding support for Ethereum and Polygon/MATIC next.

PokeDX

Powered by **\$PDX**

The PokeDX Token (PDX) is a BEP20 token (native to Binance Smart Chain) and the native token of the PokeDX ecosystem. Simply holding PDX, or a combination of PDX and PDX LP tokens, will grant the holder access to premium tools and features in the application. In addition to its utility PDX is also a reflective token, which means that a fixed % of each transaction is redistributed to holders. This happens automatically with every transaction.

LP locked for 6 months ([link](#))

FIXED SUPPLY (NO MINT)

30,000,000 PDX is the total supply

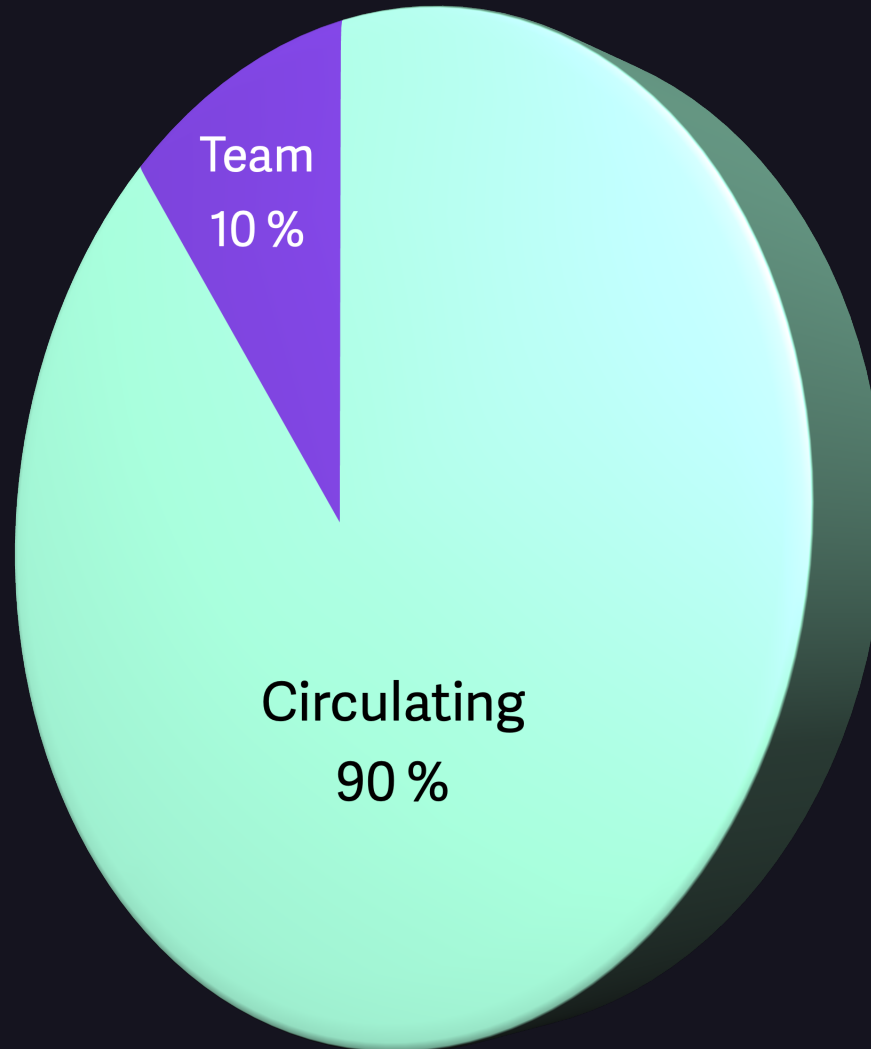

NO PRESALE

90% of supply in circulation from Day 1

Tokenomics

Max Supply	30,000,000 PDX
Mint Function	NO MINT FUNCTION
Circulating Supply	27,000,000 PDX
Team Allocation	3,000,000 PDX
Max Single Tx	150,000 PDX
Tx Fee	4% on each transaction

Token Distribution

Fee Structure

Reflection 2%

The reflection can be described as a constant dividend with payouts happening (automatically) with every transaction. The amount is conditional upon the volume being traded and is distributed proportionally to all existing HODLers. In plain terms; the more PDX you hold, the more you get with every transaction.

Auto LP 2%

The Auto Liquidity Generation provides users with perpetual entry and exit liquidity by programatically taking 2% of each transaction and adding it to the PancakeSwap Liquidity Pool. This essentially creates a pool of “un-ruggable” liquidity, as the LP tokens are sent to a locked wallet, locking the provided liquidity for 5 years.

Alpha Release

2% Reflection, 2% Auto LP

PokeDX Beta

3% Reflection, 1% Auto LP

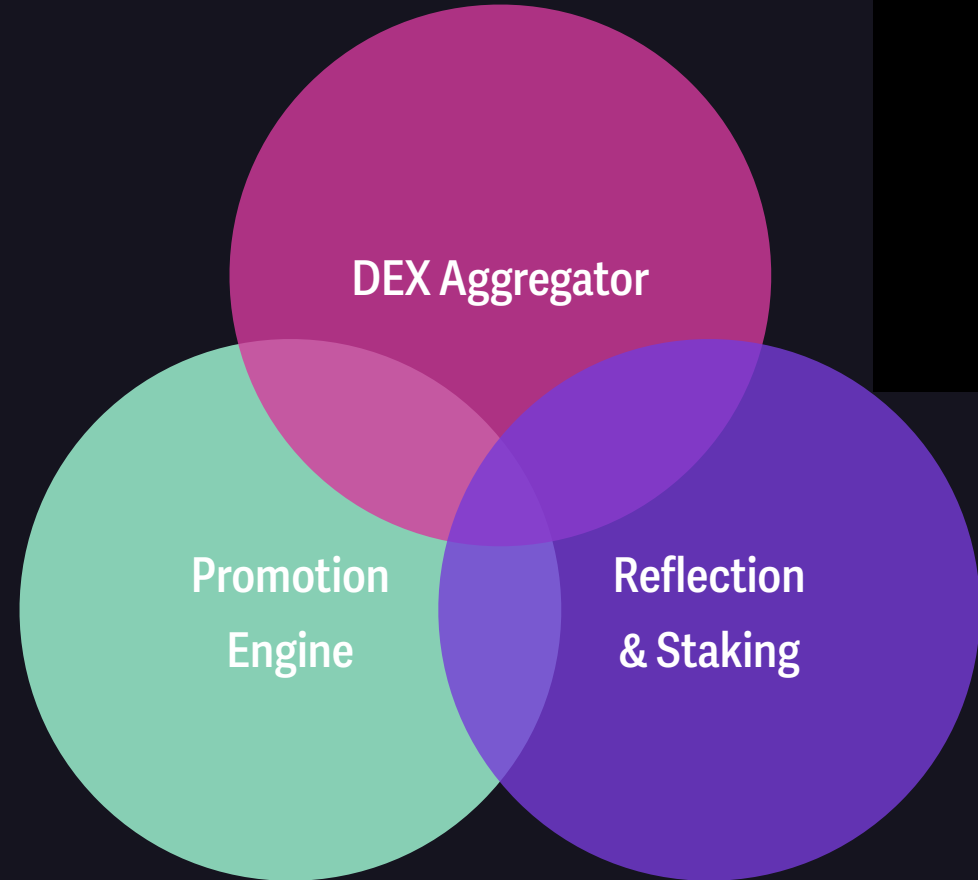

2022

4% Reflection

The Ecosystem

Blockchain and DeFi is fundamentally redefining how we think about organisations. Smart Contracts allows us to cooperate in a trustless, global environment with innovative mechanisms for stakeholder participation and rewards. PokeDX set out to build a stakeholder-centric ecosystem that utilises these Decentralised Technologies to reward all participants for their role in the project; be it investors, LPs, traders or crypto teams.

We're currently in Alpha

The Alpha phase of the software life cycle is the first phase of testing. Exercise caution and expect bugs when using PokeDX. The primary audience for this Alpha release are early adopters and cats.

Live Charts

We are experimenting with a user-friendly line / volume chart for users that prefer a simpler interface. At the same time, we know that a lot of BSC users are short-term investors and day traders, which is why we are implementing Real-Time Candle Charts as soon as we get approved by TradingView to use their library.

Wallet

No more adding tokens manually. Simply connect to see all your BSC balances and their USD value. The wallet is supported on Ethereum and Polygon in addition to Binance Smart Chain.

Recent Transactions

Stream buy and sell transactions for any BSC token in real time. We are adding a "My Trades" tab with filtered transactions in a future patch.

	Traded	Tx value	Time
Buy Order	1.517 Cake	\$38.30 USD	12:37:57 UTC Time
Buy Order	0.050 Cake	\$1.25 USD	12:37:27 UTC Time
Buy Order	15.741 Cake	\$397.36 USD	12:37:21 UTC Time
Buy Order	0.199 Cake	\$4.99 USD	12:37:00 UTC Time
Buy Order	40.452 Cake	\$1016.72 USD	12:36:45 UTC Time
Buy Order	0.083 Cake	\$2.08 USD	12:36:09 UTC Time

FIAT on-ramp

- ✓ Access all fiat-to-crypto gateways in one place
- ✓ Pay with over more than 50 fiat currencies
- ✓ Available in 170+ countries worldwide
- ✓ Transparent fees: 1% Onramper fee + gateway fees

We check which gateway has the lowest fees, and allow you to choose your preferred option. Live on PokeDX now!

PokeDX

Swaps (final stage of testing)

PokeDX aggregates offers from multiple decentralized exchanges to ensure that you always receive the best price when swapping tokens. We use Smart Order Routing to split up large trades to minimise gas costs and slippage. We are currently testing the swaps feature on Ropsten testnet.

SWAP TOKENS

Promotion Engine

Instead of displaying flashy and annoying ads, we will gradually integrate Promoted Tokens straight into the UI. Our aim is to help projects reach new audiences in a more organic and social way. Other features includes the ability to vote on tokens, displaying trending tokens with more on the drawing board.

We would love to hear your ideas!

In early development

Dev roadmap

The roadmap is subject to change. If you have any feedback or ideas, we would love to hear from you. Get in touch on yourfriends@pokedx.com

Q3

Alpha Released 🎉

- Line Price Chart ✓
- Transaction History ✓
- Wallet Balances ✓
- Fiat on-ramp ✓
- TV Advanced Charts 📊
- Swaps with 12 DEX quotes 📊
- Portfolio dashboard 📊
- "Add to watchlist" feature
- Promotion Engine v0.1

Q4

Transition to Beta

- Integrated Limit Orders
- Yield / RFI in Portfolio
- NFT's in Portfolio
- "Track wallet" feature
- Crypto Newsfeed
- Language Switcher
- Currency Switcher
- LP Staking Rewards (TBA)
- Alerts (browser, phone)

2022

Developing the Ecosystem

- Token Safety Metrics
- PokeDX Relay Online
- Collateralised options trading
- Discovery Page
- DeFi Dashboard
- Major UI update
- Expand to Ethereum
- Expand to Matic
- PokeDX Version 1.0 Launch
- Governance Module
- Algo Trading (IBT)
- Fiat on-ramp
- Mobile Apps
- DeFi options trading
- Ninja Trading Bot (DCA)
- Panic button

Team

Our goal is to provide our users with an experience so comprehensive, so powerful, and so intuitive, that their impression of decentralised trading will no longer be a challenge, rather, an opportunity available. The team has decided to remain anonymous for now, but we are active on Telegram and also do AMAs on Discord.
